Fourth-year Information Technology student at Hoa Sen University (expected 2027) seeking a Mobile or Full-stack Developer internship. Built SportArena alone: a court-booking and matchmaking platform with a Next.js 16 web app and an Expo/React Native mobile app, backed by Supabase, with Postgres-level double-booking prevention, PayOS/VietQR deposit webhooks and 150+ Vitest tests. Completed the Web Fullstack Development program at ITSS Academy and worked on three team projects as a full-stack or back-end developer. Plans and builds with Claude Code: gather requirements, research, write a plan, then implement.

Core Competencies

- **Mobile Development**: React Native and Expo; SportArena mobile app with the same booking flows as the web app; Lumina reading app (back end).
- **Full-stack Web**: TypeScript, JavaScript, Next.js 16, React 19, Angular, Tailwind CSS; ASP.NET Core MVC (basic).
- **Databases and Back end**: Supabase and PostgreSQL (Row Level Security, Realtime, exclusion constraints, pg_cron), MySQL, SQL Server, Firebase.
- **Testing and Delivery**: Vitest, Playwright, GitHub Actions, Docker, Vercel; Git and GitHub pull-request workflow.
- **AI-assisted Development**: Claude Code workflow from customer requirements and research to a written plan and a tested build.

Projects

- **github.com/tuan2304/sportarena**
  SportArena: court booking and matchmaking platform (solo) *Sep 2026 - Present*
  - Built the platform alone, with a Next.js 16, React 19 and Tailwind CSS v4 web app and an Expo/React Native mobile app that supports the same core flows.
  - Designed the Supabase Postgres schema with Row Level Security on every table, and blocked double bookings in the database with an exclusion constraint; pg_cron releases expired 15-minute slot holds and Realtime updates calendars, matches and chat.
  - Implemented VietQR deposits through PayOS v2 with webhook confirmation; owner payment keys are encrypted before storage.
  - Wrote 150+ Vitest tests, SQL tests for RLS policies and Playwright end-to-end suites, run in GitHub Actions; bilingual (Vietnamese/English) light and dark UI.

- **React Native**
  Lumina: novel-reading mobile app (team) *May 2026 - Jun 2026*
  - Developed the back end (MySQL) of a React Native app for reading novels online, as part of a team.

- **TypeScript**
  Workflow: task registration system (team) *Mar 2026 - Jun 2026*
  - Built full-stack features of a task registration system in a team for a specialization course project.

- **ASP.NET Core MVC, SQL Server**
  Onetop: online clothing shop (team) *Oct 2025 - Dec 2025*
  - Developed the full stack of an online clothing shop web app with ASP.NET Core MVC, Entity Framework Core and SQL Server.

- **ITSS Academy**
  Lightwerk: short-video platform (team) *Aug 2025 - Sep 2025*
  - Worked as a full-stack developer in a team on a TikTok-style short-video platform during the ITSS Academy program (Angular, TypeScript, Firebase).

Education

- **Hoa Sen University** **Ho Chi Minh City**
  Information Technology *2023-2027*
  In progress, expected 2027. Focus: software development for web and mobile interfaces. Relevant coursework: Web Development, Mobile Application Development, Interaction Design, Object-Oriented Systems Analysis and Design, Software Engineering, Software Architecture, Machine Learning. Currently taking: Deep Learning, Software Project Management.
- **ITSS Academy** **Ho Chi Minh City**
  Web Fullstack Development, class Web25A (certificate) *Jun 2025 - Sep 2025*
  Three-month training and internship program; team project Lightwerk (full-stack).

Experience

- **96photobooth** **Ho Chi Minh City**
  Part-time Staff, Photobooth Setup *Nov 2025 - Present*
  Sets up photo booth machines for customers.

Languages

- Vietnamese (native), English (TOEIC 510, May 2025).
